Ellomay Capital Ltd.

By: <u>/s/ Ran Fridrich</u> Ran Fridrich Chief Executive Officer and Director

Dated: May 24, 2022

Ellomay Capital Reports Publication of Financial Statements of Dorad Energy Ltd. for the Three Months Ended March 31, 2022

Tel-Aviv, Israel, May 24, 2022 – Ellomay Capital Ltd. (NYSE American; TASE: ELLO) ("Ellomay" or the "Company"), a renewable energy and power generator and developer of renewable energy and power projects in Europe and Israel, today reported the publication in Israel of financial statements for the three months ended March 31, 2022 of Dorad Energy Ltd. ("Dorad"), in which Ellomay currently indirectly holds approximately 9.4% through its indirect 50% ownership of U. Dori Energy Infrastructures Ltd. ("Dori Energy").

On May 23, 2022, Amos Luzon Entrepreneurship and Energy Group Ltd. (*f*/k/a U. Dori Group Ltd.) (the "**Luzon Group**"), an Israeli public company that currently holds the remaining 50% of Dori Energy, which, in turn, holds 18.75% of Dorad, published its quarterly report in Israel based on the requirements of the Israeli Securities Law, 1968. Based on applicable regulatory requirements, the quarterly report of the Luzon Group includes the financial statements of Dorad for the same period.

The financial statements of Dorad for the quarter ended March 31, 2022 were prepared in accordance with International Financial Reporting Standards. Ellomay will include its indirect share of these results (through its holdings in Dori Energy) in its financial results for this period. In an effort to provide Ellomay's shareholders with access to Dorad's financial results (which were published in Hebrew), Ellomay hereby provides a convenience translation of Dorad's financial results.

Dorad Financial Highlights

- Dorad's unaudited revenues for the three months ended March 31, 2022 approximately NIS 555.4 million.
- Dorad's unaudited operating profit for the three months ended March 31, 2022 approximately NIS 80 million.

Dorad's financial statements for the quarter ended March 31, 2022 note that following the outbreak of the coronavirus (COVID-19) in China in December 2019, and the spreading of the coronavirus to many other countries in early 2020, there has been a decline in economic activity in many regions of the world, as well as in Israel. The spreading of the coronavirus caused, among other things, a disruption in the supply chain, a decrease in global transport volume, traffic and employment restrictions declared by the Israeli government and other governments around the world, as well as declines in the value of financial assets and commodities in markets in Israel and around the world. Dorad notes that it is operating in accordance with the guidelines of the Israeli Ministries of Energy and Health on dealing with the coronavirus crisis, including preparations of the operation and maintenance employees of the power plant and shift work as required. Dorad's financial statements further note that there is a certain increase in the electricity consumption of various customers compared to the first quarter of 2021. Dorad notes that it is continuously examining its potential methods of action in the event of a material decline in its income as a result of the spread of the coronavirus.

Based on the information provided by Dorad, the demand for electricity by Dorad's customers is seasonal and is affected by, inter alia, the climate prevailing in that season. The months of the year are split into three seasons as follows: the summer season – the months of July and August; the winter season - the months of December, January and February; and intermediate seasons – (spring and autumn), the months from March to June and from September to November. There is a higher hourly demand for electricity during the winter and summer seasons, and the average electricity consumption per hour is higher in these seasons than in the intermediate seasons and is even characterized by peak demands due to extreme climate conditions of heat or cold. In addition, Dorad's revenues are affected by the change in load and time tariffs - TAOZ (an electricity tariff that varies across seasons and across the day in accordance with demand hour clusters), as, on average, TAOZ tariffs are higher in the summer season than in the intermediate and winter seasons. *Therefore, the results presented for the quarter ended March 31, 2022, which include the winter months of January and February and the intermediate month of March, are not indicative of full year results. In addition, due to various reasons, including the effects of the spread of COVID-19 and the economic impact of such spread and of actions taken by governments and authorities, the results include herein may not be indicative of first quarter results in the future.*

A translation of the financial results for Dorad as of and for the year ended December 31, 2021 and as of and for the three month periods ended March 31, 2021 and 2022 is included at the end of this press release. Ellomay does not undertake to separately report Dorad's financial results in a press release in the future. Neither Ellomay nor its independent public accountants have reviewed or consulted with the Amos Luzon Entrepreneurship and Energy Group Ltd., Dori Energy or Dorad with respect to the financial results included in this press release.

About Ellomay Capital Ltd.

Ellomay is an Israeli based company whose shares are registered with the NYSE American and with the Tel Aviv Stock Exchange under the trading symbol "ELLO". Since 2009, Ellomay Capital focuses its business in the renewable energy and power sectors in Europe and Israel.

To date, Ellomay has evaluated numerous opportunities and invested significant funds in the renewable, clean energy and natural resources industries in Israel, Italy and Spain, including:

- Approximately 7.9MW of photovoltaic power plants in Spain and a photovoltaic power plant of approximately 9 MW in Israel;
- 9.375% indirect interest in Dorad Energy Ltd., which owns and operates one of Israel's largest private power plants with production capacity of approximately 860MW, representing about 6%-8% of Israel's total current electricity consumption;
- 51% of Talasol, which owns a photovoltaic plant with a peak capacity of 300MW in the municipality of Talaván, Cáceres, Spain;
- Groen Gas Goor B.V., Groen Gas Oude-Tonge B.V. and Groen Gas Gelderland B.V., project companies operating anaerobic digestion plants in the Netherlands, with a green gas production capacity of approximately 3 million, 3.8 million and 9.5 million (with a license to produce 7.5 million) Nm3 per year, respectively; and
- 83.333% of Ellomay Pumped Storage (2014) Ltd., which is involved in a project to construct a 156 MW pumped storage hydro power plant in the Manara Cliff, Israel.

Information Relating to Forward-Looking Statements

This press release contains forward-looking statements that involve substantial risks and uncertainties, including statements that are based on the current expectations and assumptions of the Company's management. All statements, other than statements of historical facts, included in this press release regarding the Company's plans and objectives, expectations and assumptions of management are forward-looking statements. The use of certain words, including the words "estimate," "project," "intend," "expect," "believe" and similar expressions are intended to identify forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Company may not actually achieve the plans, intentions or expectations disclosed in the forward-looking statements and you should not place undue reliance on the Company's forward-looking statements. Various important factors could cause actual results or events to differ materially from those that may be expressed or implied by the Company's forward-looking statements, including regulatory changes, the decisions of the Israeli Electricity Authority, changes in demand, technical and other disruptions in the operations of the power plant operated by Dorad and changes in the prices of natural gas and the impact of the cornourius pandemic on Dorad's operations and projects, including in connection with reductions in the consumption of electricity by Dorad's customers and the Israeli Electricity Company, delays in supply of gas, steps taken by Israeli authorities, regulatory changes, changes in the supply and prices of resources required for the operation of the Dorad's facilities (and in the price of oil and electricity, and technical and other disruptions in the operation to other risks and uncertainties associated with the Company's business that are described in greater detail in the filings the Company makes from time to time with Securities and Exchange Commission, including its Annual Report on Form 20-F. The forward-looking statements are m
